**RESPONSIBLE DISTRIBUTION NEWS & UPDATES**

**Responsible Distribution: Regional Workshop — Registration Open**  
Registration is now open for our special One-Day Regional Workshop on Oct. 24, hosted by Sea-Land Chemical Co. in Cleveland. The workshop will feature hands-on training in Management of Change, Risk Prioritization, Root Cause Analysis, and more from experienced Code Coordinators and Responsible Distribution Advisors. Space is limited to the first 25 registrants, so sign up today to take advantage of this special workshop and further the continuous improvement of your Responsible Distribution program.

**Responsible Distribution Resource of the Week: Reviewing Previous Cycle Reports**  
Did you know you have access to your previous Responsible Distribution Verification reports through the new Dashboard tool? All previous cycle reports are available for download directly from the dashboard. As you complete your Specifications for your upcoming 6th Cycle verification, take a moment to review the observations, any non-conformances, and corrective actions noted by the verifiers in the previous cycle. Have these been successfully incorporated into your current Responsible Distribution program and reflected in your new 6th Cycle Specifications? In raising the bar this cycle, verifiers will be paying attention to any areas previously cited, as repeat non-conformances will be considered a major non-conformance. If you need help locating or downloading your 5th cycle report, please contact Caroline Kramer.

**Post-Hurricane Irma Hotel Relocation for the 2017 Annual Meeting**  
Following Hurricane Irma's landfall, NACD has been in regular contact with our host hotel, the Naples Grande Beach Resort as they weathered the storm, availed power, and assessed any damage. We appreciate your patience as we worked with the hotel's general manager and his team. On Sept. 19, we learned that this powerful storm caused significant damage to the property and will not be ready to host our meeting by mid-November. Prior to receiving this news, our director of meetings, Tracey Pierce, conducted a nationwide search for alternate properties of the size and quality properties, just in case we were to face this situation. Tracey found a fantastic option and we are currently in talks with them to contract for our event over the exact same event dates of Nov. 13-16. [READ MORE](#)

**Upcoming Webinar: An Overview of DEA Listed Chemicals Regulations**  
Noon-1 p.m. ET, Thursday, Oct. 19  
Speaker(s): The Drug Enforcement Administration  
[Register now](#)

Join NACD and the Drug Enforcement Administration for a webinar on DEA listed chemical regulations at 12 p.m. ET, Thursday, Oct. 19. List I and List II chemicals are chemicals that are used to manufacture controlled substances and/or illicit drugs. During the webinar, DEA speakers will provide an overview of DEA regulations that apply to the storage, handling, reporting and import/export of listed chemicals.

The You Be The Chemist® Challenge Study Guide for the Challenge Qualifier and Local Challenge levels is posted for the 2017-2018 cyclet Planning to have your student participate this year? Get ahead of the game by downloading our free study materials now!

**GENERAL BUSINESS INTEREST**

**4 Things Interviews of Tomorrow Must Discover**  
Traditional hiring has largely focused on a candidate's experience and education as the primary qualifiers for a position. Both skills and knowledge can be learned and mastered over time. While there certainly is merit in evaluating what someone has learned and what he or she has done so far in a career, it is at best an incomplete set of criteria. Why? Because there is more to performing a job than just knowledge and skills. [READ MORE](#)

**Supply Chain Losing Hours, Money To Poor Financial Systems**  
Clunky payment practices are causing friction in U.S. business' supply chain. The average U.S. business loses \$111,340 per year. This equates to almost 6,500 man hours chasing purchase order numbers, processing paper invoices and responding to supplier inquiries, according to a new study, "Friction Index" report, by Tungsten Network.
